SUMMARY

Full-Stack Software Engineer with experience building production-grade web applications, REST APIs, and AI-integrated platforms. Co-founder of InsightScribe, a SaaS platform built on React/Next.js and Node.js/Express integrating OpenAI and Whisper APIs. Strong foundation in modular backend architecture, database design, and cross-functional engineering.

EDUCATION

Master of Science in Computer Science — Clark University
Aug 2024 – May 2026
GPA: **3.7 / 4.0**

Bachelor of Technology in Computer Science — JNTU
Aug 2019 – May 2023
GPA: **3.5 / 4.0**

PROFESSIONAL EXPERIENCE

Teaching Assistant — Clark University

Aug 2025 – Present | Worcester, MA

- Led hands-on labs for **React and Node.js**, guiding 40+ graduate students in building full-stack applications
- Debugged backend servers, APIs, environment configurations, and dependency issues (npm, Node, ports)
- Explained system design concepts including component architecture, state management, and API communication
- Created structured code walkthroughs and documentation, improving lab completion efficiency and code quality

AI/ML Engineering Intern — IMAI Innovations

Dec 2023 – May 2024 | Abu Dhabi, UAE

- Developed and deployed **secure REST APIs** to expose AI-driven features to client-facing platforms
- Built backend services supporting analytics, automation, and ML workflows
- Collaborated with cross-functional teams to translate requirements into scalable software solutions
- Improved system efficiency by optimizing data flows, backend logic, and applying security best practices to production API deployments.

PROJECTS

JobQuest - Full-Stack Job Application Management Platform | GitHub

(Solo Project | End-to-End Ownership)

- Designed and built a full-stack application using **Node.js, JavaScript, REST APIs, and SQL**, managing the project independently from ideation to deployment
- Integrated **USAJobs API** to fetch and normalize real-time job listings, reducing manual job tracking effort by **70%**
- Modeled application data to analyze response timelines and success rates, improving follow-up effectiveness by **30%**
- Implemented clean, modular backend architecture with version control, demonstrating production-ready engineering practices

InsightScribe - Full-Stack AI Platform | GitHub

(Co-Founder & Frontend Engineer | In Development)

- Co-built a production-grade SaaS platform using **React/Next.js frontend and Node.js/Express backend**
- Integrated third-party AI APIs (OpenAI, Whisper, HuggingFace) into a scalable, modular architecture
- Designed and implemented **SQL/NoSQL database schema** to support audio storage, transcript indexing, and cross-recording queries
- Delivered full UI/UX from wireframe to working product in a fast-paced co-founder environment

Real-Time Facial Emotion & Age Detection System | GitHub

(Software + ML Integration Project)

- Developed a real-time application integrating **computer vision models** with live data streams
- Implemented efficient data processing pipelines to support low-latency inference
- Demonstrated ability to integrate ML components into end-to-end software systems

---

SKILLS

Languages: Python, Java, JavaScript, SQL, C/C++
Backend & Web: Node.js, Express, Nest.js, React, REST APIs, PHP, HTML, CSS
Databases: PostgreSQL, MySQL, MongoDB
Cloud & Tools: AWS, Google Cloud, Git, Jira, GraphQL, TypeScript, Docker, Kubernetes, PostgreSQL
Engineering Practices: Clean Code, Modular Architecture, Version Control, Debugging

CERTIFICATIONS

AWS Educate Web Builder | AWS Educate Machine Learning | Applied Data Science (IBM)
