SUMMARY

Data Scientist with hands-on experience in predictive modeling, NLP, and applied LLM engineering. Built production-style AI pipelines including an LLM-powered SQL agent (EnterpriseIQ) and an audio intelligence platform (InsightScribe). Strong foundation in Scikit-learn, TensorFlow, and end-to-end data science workflows from feature engineering to model evaluation.

EDUCATION

Master of Science in Computer Science — Clark University
Aug 2024 – May 2026
GPA: **3.7 / 4.0**

Bachelor of Technology in Computer Science — JNTUH
Aug 2019 – May 2023
GPA: **3.5 / 4.0**

PROFESSIONAL EXPERIENCE

Teaching Assistant — Clark University

Aug 2025 – Present | Worcester, MA

- Supported graduate-level data science and analytics coursework through hands-on guidance and analytical explanations
- Guided students through end-to-end project workflows, from data collection and cleaning through model training and final evaluation
- Communicated complex data science concepts clearly to diverse academic audiences
- Supported students with Python-based ML implementations, statistical analysis, and model evaluation workflows

AI/ML Engineering Intern — IMAI Innovations

Dec 2023 – May 2024 | Abu Dhabi, UAE (Remote)

- Performed end-to-end data science workflows including data cleaning, exploratory data analysis, feature engineering, and model evaluation
- Built predictive models to analyze employee churn and engagement, improving churn prediction accuracy by **22%**
- Conducted statistical analysis to identify behavioral and performance patterns, supporting data-driven retention strategies that improved operational efficiency by **23%**
- Evaluated models using precision, recall, F1-score, and ROC-AUC to assess predictive reliability
- Translated complex analytical results into clear insights for business and leadership teams

PROJECTS

EnterpriseIQ - NLP-to-SQL Business Intelligence Agent | Demo | GitHub

(Independent Project)

- Developed an **NLP-powered AI agent** using **LangChain and LLaMA-3.3-70b (Groq)** that translates natural language business questions into accurate SQL queries across relational schemas
- Applied **prompt engineering and agent orchestration** techniques to handle multi-step reasoning across JOINs, aggregations, and foreign key traversals
- Demonstrated applied LLM pipeline design: natural language input → schema-aware reasoning → SQL execution → structured insight delivery

Academic Data Visualization Projects | Tableau Public

(Independent Data Analysis Projects)

- Built and published 7 interactive Tableau dashboards applying statistical analysis across healthcare, oncology, education, and manufacturing datasets
- Analyzed survival rates and treatment responses across 1,000 lung cancer patients, identifying a counterintuitive smoking-survival correlation and documenting confounding variables
- Translated complex clinical and operational findings into structured story dashboards for non-technical audiences

InsightScribe - AI-Powered Audio Intelligence Platform | GitHub

(Co-Founder & ML/AI Engineer | In Development)

- Built NLP pipeline using **OpenAI Whisper and HuggingFace** to extract structured insights and summaries from unstructured audio data
- Engineered **cross-recording intelligence** to identify patterns and trends across multiple sessions using LLM-based analysis
- Applied text mining and semantic analysis techniques to transform raw transcripts into actionable, queryable insights

SKILLS

Data Science & Analytics: Exploratory Data Analysis (EDA), Statistical Modeling, Feature Engineering, Predictive Modeling, Model Evaluation
Programming: Python, SQL, R
ML & AI: Scikit-learn, TensorFlow, Machine Learning, NLP, LangChain, LLMs
Tools: Pandas, NumPy, Jupyter Notebook
Visualization: Tableau, Power BI
Professional: Analytical Thinking, Independent Research, Data Storytelling, Communication

CERTIFICATIONS

Applied Data Science (IBM) | Data Analytics on Google Cloud | AWS Educate Machine Learning
